

# FORCE4® TEXAS EDITION

A premium FORCE4® chain with a segment designed for optimum cutting speed and life in very hard aggregate.

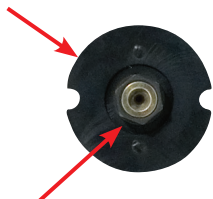

Features:

- Highest available diamond concentration
- Extended cutting life in hard aggregate
- Proprietary mix of diamond sizes and grades delivers exceptional cutting speed
- Segment processing ensures consistent speed and life

Compatible with FORCE4® guidebars and sprockets

## FORCE4® DRIVE SPROCKET

Upgraded guide ring design distributes load for greater durability

Tool steel alloy guarantees exceptional strength, life, and abrasion resistance

## FORCE4® GUIDE BAR

Laser-cut internal water channels keep the nose sprocket lubricated

Deep groove stabilizes FORCE4® guidebar chassis for straighter, cleaner cuts

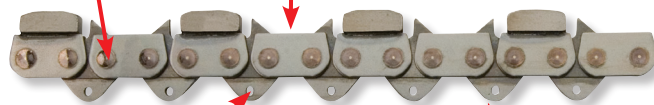

Available in 10-, 15-, 20-, and 25-inch cutting depths

Rivet design means less stretch

50% greater tensile strength to reduce breaking

Highest available concentration of diamonds extends cutting life

Water distribution feature allows for better lubrication between bar and chain

Deep engagement driveline help keep cuts straight

Patented SealPRO® O-ring and bumper design for smooth cutting performance and maximum life
